SECURITY & SAFETY FIRST

Capstan Security was formed in 1978 with the objective to provide our customers with quality security products, expert system designs, installations, service and value.

At Capstan, we believe that our attention to detail coupled with a proven ability to install and maintain security and fire systems efficiently have been the key to our success.

Our advice is entirely free with no obligation and our expert Security Surveyors can offer free estimates for Intruder Alarm systems and any of our range of products and services shown here including monitoring of your system at our award-winning Alarm Receiving Centre.

Security recommendations

This guide gives you an overview of Capstan's comprehensive product range.

1. Upper Windows: Locks, grilles, collapsible gates.
2. Garage: Roller doors with remote control.
3. Door Entry System
4. Main Entrance: Mortice lock, security deadlatch, hinge bolts, steel reinforcing strip, steel sheet, anti-bandit gate, doorview, door chain, door entry system, grille for glass area, alarmed keypad control.
5. Ground Floor Windows: Locks, grilles, collapsible gates.
6. CCTV
7. French Doors: Locks, grilles, collapsible gates, continental shutters.
8. Alarm System
9. Side & Back Doors: Mortice locks, grilles, hinge bolts.
10. Roof Light: Locks, grilles.

Statistics prove that by taking quite simple, relatively inexpensive precautions you can deter the would-be intruder(s), the majority of whom are opportunistic sneak-thieves. It is of course necessary to take extra precautions to keep out the professional burglar but remember that security buys you time, something the intruder does not have.

The colour coded list below will help you to decide what steps you need to take to protect your premises.

- **FRONT DOOR** - should have a BS3621 Kitemarked 5, 6 or 7 lever mortice lock or cylinder mortice lock together with a cylinder rim deadlock also to BS3621.
- **SIDE & BACK DOORS** - fit a 5,6 or 7 lever BS3621 mortice lock together with top and bottom security bolts.
- **WINDOWS** - windows are most vulnerable to forced entry, especially at the rear of the house. Fit window locks to all ground and upper floor windows where necessary particularly where there is a flat roof or drainpipe etc.
- **FRENCH WINDOWS & PATIO DOORS** - fit appropriate key-operated locks to the top, bottom and centre (if necessary) of doors.
- **OUTBUILDING & GARAGES** - often contain garden equipment etc that would be useful to a burglar, so ensure they are secured by a suitable mortice lock or padlock.
- **INTRUDER ALARMS** - the installation of a simple intruder alarm with the deterrent value of a strategically located external siren cover bearing the Capstan name, with pulsing lights incorporated to provide clear indication of a live and fully functional system. Designed and installed to be fully compliant with the ACPO policy, DD243 and European Standard EN 50131-1:2006 /PD6662 for Intruder Alarm installations.
- **FIRE PROTECTION** - Either wireless or wired fire alarms designed and installed to comply with BS 5839:2002 Part 1 & 6 or fixed detection devices simply connected into your intruder alarm system.
- **ALARM RECEIVING CENTRE** - provides 24-hour monitoring for all types of alarm systems.
- **KEYHOLDING / ALARM RESPONSE SERVICE** - for domestic and commercial properties.
- **CCTV & DOOR ENTRY SYSTEMS** - suitable for both domestic and commercial situations.

Gates / Grilles / Shutters

Suitable for a high level of protection to windows and doors.

Made to measure, retractable, strong steel gates:

- Can be pushed back out of sight when not in use
- Can operate with same key as front door

Strapping, barred, diamond mesh & ornamental grilles:

- Hinged or removable to facilitate cleaning, and available in a range of colours

Roller & Continental Shutters

- Internal & External Applications
- Manually or Electrically Operated
- Extra Protection against burglary and vandalism
